I would first like to say, Thank You to Rock in Prevention. Their program and message was exactly what our school needed and we will continue to implement it throughout the school year. Combined with the anti-bullying message we received last year, our school has many tools to help our students be successful.

The four presenters that came to our school were wonderful. They each had a positive attitude, lots of energy, and portrayed the message they were teaching. You could tell, through their performance, that they knew what they were doing and that they cared about students receiving the message about good character.

The way the message was taught will help the students remember it for the year to come. The repetition of the songs helped students, we will be using those songs throughout the year.

I truly enjoyed the performance and I am looking forward to carrying out the Rock in Prevention message everyday with our students at Centura Elementary. Thank you again for teaching our students about what character is and how we will "Do the right thing, at the right time" at our school.

Sincerely,

Cory Bohling  
Centura Elementary Principal/Curriculum Director
