To Whom It May Concern:

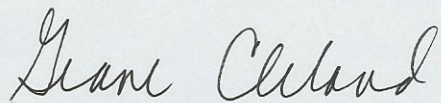

If you are looking for an educational and highly energetic and interactive bullying prevention workshop, I would definitely recommend Rockin Prevention. They are awesome! Their music is excellent. The songs are all interactive and easy to learn. The skits for the intermediate grades target important skills and are designed so that even the shiest students can participate. As the school principal, I was amazed to see our usually squirmy 4-year-old preschoolers completely engaged for the entire hour!

During the serious, but still engaging part of the workshop, the message is loud and clear, "If you want to wipe out bullying in your school, here's how to do it." Students learn about caring for themselves and caring for each other. They learn what to do and practice what to say if they see bullying happening. Our new motto at Corse is, "We don't do that here!"

As the students left the workshop, I overheard a first grader telling his friend, "I want to do that again." Even the teachers remarked that it was the best workshop we have had in a long time. Having the high school kids (some were former Corse students) as mentors for our students was a great bonus.

Thank you so much for such an uplifting educational experience.

Sincerely,

Geane Cleland, Principal
