November 15, 2013

Edmunds Elementary school was able to participate in Rock in Prevention for one of our Positive Behavior Intervention Supports (PBIS) Celebration. The continued support of grant funding provided this wonderful opportunity for our school community.

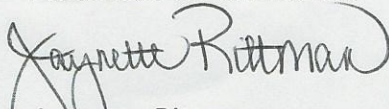

The Rock in Prevention team entertained, engaged and presented a clear message of staying drug free, as well as, effective ways to refuse alcohol and tobacco. Their high energy, upbeat approach and interactive activities kept students engaged and focused on the message.

The Rock in Prevention team reinforced his message through the use of high school helpers from local high schools. They reinforced how to confront bullying by immediately saying "We don't do that here!"

We received numerous comments from students and staff regarding how well the team interacted with the students and how much students enjoyed the assembly. The conversation in classrooms following the assembly was powerful. Classrooms in third - fifth grade continue to utilize the 12 week program to reinforce the message to confront bullying by using the CD and follow up activities to keep the message current and fresh for our students.

We are very excited to welcome Rock in Prevention back in the future!

Thanks Rock in Prevention! You delivered such an important message in a way students will remember for a lifetime!

Jaynette Rittman
Edmunds Principal

As a community, Edmunds Elementary provides high quality education and engaging curriculum for all students and celebrates cultural diversity in a positive and respectful environment to prepare life-long learners for success.
