January 28, 2016

To Whom It May Concern:

It is my privilege to write this recommendation letter for the Rock In Prevention program. Rock In Prevention has visited Davis Elementary for three years, however, this is my first year working in the Grinnell-Newburg School District. Before I began to communicate with the representatives from Rock In Prevention, I heard great things from the staff who witnessed their program in previous years. Once I began communicating with the representative from Rock In Prevention, I was very impressed with how easy and organized the process was to prepare for.

The presenters were well prepared, professional, and really got our students engaged in their program! This year, Rock In Prevention delivered their Character Education program. It was a wonderful supplemental activity for our students that reinforced the concepts taught to our students within the school counseling program and the building community.

As a 2015 National Blue Ribbon School, the staff at Davis Elementary pride ourselves on showing that all students can achieve academically, and we know that in order to equip all of our students with the skill necessary to succeed, we cannot stand simply as a school alone. It takes a partnership between the school, community, and programs like Rock In Prevention to truly engage and provide our students with a great educational experience!

Sincerely,

A handwritten signature in black ink that reads "Kelsi Walter".

Kelsi Walter

School Counselor, Davis Elementary
