Rock In Prevention,

We were lucky to have Rock In Prevention present a great show with a great message here at Washington Elementary through the generosity of Johnson Controls, which we greatly appreciate. The presenters had high enthusiasm throughout the assembly. There were only smiles to be seen throughout the gym and you could feel the positive, uplifting energy. Both staff and students were involved the entire time singing, dancing, performing skits, and interacting with the presenters and each other.

I especially liked the program using our high school students as mentors and role models. The presenters even had a few of our Spanish speaking students lead the others in singing one of the songs in Spanish. It was a memorable experience for all.

When delivering the CDs to the students, which included the songs from the assembly, they were excited to be able to take them home. We look forward to using those songs as well as the follow up materials in our classrooms to reinforce the positive messages of creating a caring community within our school.

I felt compelled to write this letter of recommendation because I have heard more positive feedback regarding this assembly than any others we have had. We hope to have Rock In Prevention visit us again in the future.
